

INVITATION FOR POSTER PRESENTATION

U.S. Department of Energy (DOE)

Mastering the Subsurface through Technology Innovation and Collaboration: Carbon Storage and Oil and Natural Gas Technologies Review Meeting Sheraton Station Square, Pittsburgh, PA, August 16-18, 2016

A key component of the U.S. Department of Energy's (DOE's) *2016 Mastering the Subsurface through Technology Innovation and Collaboration: Carbon Storage and Oil and Natural Gas Technologies Review Meeting* will be the poster session to be held during the first evening of the meeting on August 16. The purpose of the poster session is to provide synergistic opportunities for research being conducted in the subsurface. This is an excellent networking opportunity between colleagues working on the development of novel subsurface technologies.

Invited Presenters

Posters are encouraged from the following organizations:

- DOE national laboratories that are participating in the Subsurface Technology and Engineering Research, Development, and Demonstration (SubTER) Crosscut initiative, the Carbon Storage Program, relevant projects from the Natural Gas and Oil Program, or other relevant subsurface technology development efforts, such as Energy Frontier Research Centers;
- Organizations that are serving as subcontractors under Carbon Storage Program projects or relevant projects from the Natural Gas and Oil Program;
- Organizations that are participating directly in other U.S. and international projects that are working to characterize storage capacity through exploration and injection operations; and
- International carbon storage demonstration projects.

Presentation Topics

The National Energy Technology Laboratory (NETL) anticipates that approximately 50 posters will be accepted. Topics to be addressed by the posters include, but are not limited to:

- Field and infrastructure activities (drilling, hydraulic fracturing, injection, CO₂ transportation, production, etc.)
- Recent improvements in oil and natural gas technologies and operations
- Associated storage efforts
- International storage projects
- Surface and subsurface monitoring technologies
- Geologic storage technologies
- CO₂ resource assessments onshore and offshore
- Simulation and risk assessments
- Water management in storage projects
- Regulatory analyses and public outreach activities

To submit a poster for consideration, please complete and submit the attached Poster Abstract Submission Form to NETL by June 30, 2016.

Poster Presenters will be notified of acceptance or non-acceptance in early July, 2016.

Note: Any Foreign National presenting a poster on behalf of a project supported by a financial assistance agreement with the U.S. DOE must be approved for work on the project. Questions regarding whether an individual is approved for work on a project should be directed to the appropriate Federal Project Manager.
