U.S. DEPARTMENT OF ENERGY OFFICE OF ENERGY EFFICIENCY AND RENEWABLE ENERGY NEPA DETERMINATION

E D IS
Sares S

RECIPIENT: Daimler Trucks North America STATE: OR PROJECT TITLE : Daimler Trucks North America's SuperTruck 3 Project: Ultra-Efficient Long Haul Hydrogen Fuel Cell Tractor Funding Opportunity Announcement Number Procurement Instrument Number NEPA Control Number CID Number Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Policy 451.1), I have made the following determination: CX, EA, EIS APPENDIX AND NUMBER: Description: Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analysis and information dissemination (including, but not limited to, document publication and distribution, and classroom training and information inprograms), but not numled to the conceptual design, feasibility studies, and analysis and information dissemination dissemination dissemination distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. (See also B31 of appendix B b this subpart.) A9 Information gathering, analysis, and dissemination Sting, construction, modification, operation, and decommissioning of facilities for smallscale research and development projects; conventional laboratory operations (such as preparation of chemical standards and sample analysis); and small-scale pilot projects (generally less than 2 years) frequently conducted to verify a concept before demonstration actions, provided that construction or modification would be within or configuous to a previously disturbed or developed area (where active utilities and current) used roads are readily accessible). Not included in this category are demonstration actions, that are undertaken at a scale to show whether a technology would be viable on a larger scale and suitable for commercial deployment. B3.6 Small-scale research and development, laboratory development, laboratory operations, and pilot projects undertaken at a scale to show whether a technology would be viable on a larger scale and suitable for commercial deployment. (a) Actions to conserve energy or water, demonstrate potential energy or water conservation, and promote energy efficiency that would not have the potential to cause significant changes in the indoor or outdoor concentrations of potentially harmful substances. These actions may involve financial and technical assistence to individuals (such as builders, owners, consultants, manufacturers, and designers), organizations (such as utilities), and governments (such as state, local, and trabe). Covered actions include, but are not limited to weatherization (such as insulation and a drowerheads), heating, euritation, and a conditions settings, placement of timeses insulation of drip-inigation replacement of energy efficient lighting, low-How planning fluxners (such as faucets, tolets, and showerheads), heating, euritation, and are containing systems, and appliances; instaliation of drip-inigation replacement of energy efficiently intras, particular state (such as state), betting, euritation, and are containing systems, and appliances; instaliation of drip-inigation replacement of energy efficiently and papilance efficiency raings, efficiency improvements for vehicles and transportation (such as filed changeout), plate number recognition); development of energy-efficient manufacturing, industrial, or building practices; and small-scale energy efficiency and conservation research and development andsmal-scale plot projects. Covered actions is nucled building renovations o renew structures, provided that they occur in a previous) glisation, except for thoras eactors listed in B5.1(b) of this appendix. (b) Covered actions include builder area, Covered actions would not; (1) have the potential to cause a significant thange in manufacturing infrastructure (such as construction of new manufacturing plants with considerable associated ground disturbance); (2) novle significant unresolved confli B5.1 Actions to conserve av or wate

Rationale for determination:

NEPA PROVISION

DOE has made a conditional NEPA determination

The NEPA Determination applies to the following Topic Areas, Budget Periods, and/or tasks:

The NEPA Determination does not apply to the following Topic Area, Budget Periods, and/or tasks:

A completed EQ is required for the TBD field location. A separate NEPA review is required for the TBD location site. This CX covers all activities except the TBD location site.

Notes

A completed EQ is required for the TBD field location. A separate NEPA review is required for the TBD location site. This CX covers all activities except the TBD location site.

FOR CATEGORICAL EXCLUSION DETERMINATIONS

The proposed action (or the part of the proposal defined in the Rationale above) fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D. Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous subbances, pollutants, contaminants, contaminants, or CERCLA-excluded percleum and natural gas products that previxin the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impa environmentally sensitive resources, including, but not limited to, those listed in paragraph 8(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious week invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposed action that may affect the significance of the environmental effects of the proposal.

The proposed action has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not preduded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

A portion of the proposed action is categorically excluded from further NEPA review. The NEPA Provision identifies Topic Areas, Budget Periods, tasks, and/or subtasks that are subject to additional NEPA review
