PMC-ND		U.S. DEPA	RTMENT OF ENERGY	State of the second	
(1.08.09.13	• OFF		ICIENCY AND RENEWABLE EN DETERMINATION	ERGY	
RECIPIENT:	Virginia Depa	rtment of Energy		STATE: VA	
PROJECT TI	ROJECT TITLE : The Mid-Atlantic Electrification Partnership: An Electrification Ecosystem of Intermodal Leadership and Intercity Travel				
	Funding Opp	De-FOA-0002197	Procurement Instrument Number DE-EE0009225	NEPA Control Number NETL-0009225-0063	CID Number
Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Policy 451.1), I have made the following determination:					
CX, EA, EIS A Description:	APPENDIX AND NUMB	ER:			
A9 Information gathering, analysis, and dissemination		Information gathering (including, but not limited to, literature surveys, inventiones, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental innotineing, See also B3.1 of appendix B to this subpart.)			
B3.6 Small-scale research a development, laboratory operations, and pilot projec		Siting, construction, modification, operation, and decommissioning of facilities for smallscale research and development projects; conventional laboratory operations (such as preparation of chemical standards and sample analysis); and small-scale pilot projects; (generally less than 2 years) frequently conducted to userify a concept before demonstration actions, provided that construction or modification vould be within or construins); defined that construction or modification vould be within or construins); defined as a previous of table of a developed area of veherol actions are undertaken at a scale to show whether a technology would be viable on a larger scale and suitable for commercial deployment.			
85.1 or w	Actions to conserve energy ater	gv (a) Actions to conserve energy or water, demonstrate potential energy or water conservation, and promote energy efficiency that would not have the potential to cause significant changes in the indoor or outdoor concentrations of potentially harm substances. These actions may involve financial and technical assistance to individual (such as builders, owners, consultants, manufacturers, and designers), organizations (such as utilities), and governments (such as state, local, and thbal). Covered actions include, but are not limited to weatherization (such as insulation and replacing windows and doors); programmed loweing of themostal settings, placement of limers on hot water heaters, installation or replacement of energy efficient lighting, low-llow plumbing fatures (such as faulders, toilets, and showerheads), heating, ventilation, and an opticing systems, and appliances, installation of drip-irrigation systems; improvements in generator efficiency and appliance afficiency rainage, efficiency purportements for ventiles and transportation (such as tell signal control systems, can ravigation, speed cameras, and automatic plate number recognition); development of energy-efficient manufacturing, industrial, or building practices, and small-acable energy efficiency and agricultural, academic, institutional, or industrial sectors. Covered actions on to include rulemakings, standard-settings, or propeed DOE legislation, except for those actions listed in B5.1(b) of this appendix. (b) Covered actions include rulemakings that accounse under given activation standards for covered actions include rulemakings that activations event of the actors would not. (1) have the potential to cause a significant change in manufacturing plantstructure (such as construction of new manufacturing plants with considerable associated ground disturbance); (2) involve significant tures eved colinistic) out as correct actions industrial equipacity.			
B5.2 static	3 Electric vehicle charging ons	g The installation, modification, operation, and removal of electric vehicle charging stations, using commercially available technology, within a previously disturbed or developed area. Covered actions are limited to areas where access and parking ar in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.			

Rationale for determination:

NEPA PROVISION

DOE has made a conditional NEPA determination

The NEPA Determination applies to the following Topic Areas, Budget Periods, and/or tasks:

The NEPA Determination does not apply to the following Topic Area, Budget Periods, and/or tasks:

A completed EQ is required for the TBD location sites/charging stations. A separate NEPA review is required for the TBD location sites. This CX covers all activities except the TBD location sites.

Notes:

This project number and recipient have previously received a CX on previous work. This new CX has been signed due to the recipient adding additional project locations. The control number reflects the prime recipient has received multiple NEPA determinations. As noted by the NEPA Control Number NETL-0009225-0063 this is the 63rd CX associated with the initial award.

FOR CATEGORICAL EXCLUSION DETERMINATIONS

The proposed action (or the part of the proposal defined in the Rationale above) fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment facilities (including incinerators), but the provisit in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contineed or anfined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contineed or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposed action that may affect the significance of the environmental effects of the proposal.

The proposed action has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

A portion of the proposed action is categorically excluded from further NEPA review. The NEPA Provision identifies Topic Areas, Budget Periods, tasks, and/or subtasks that are subject to additional NEPA review.

SIGNATURE OF THIS MEMORANDUM CONSTITUTES A RECORD OF THIS DECISION.
