Re: G&W Viper Capacity

Dear Sir or Madam,

G&W Electric is committed to always being a preferred supplier through excellence in design, product quality, facilities investment and customer service. By continually investing in operational excellence, G&W Electric has increased capacity to meet the growing demands of our customers. Our process and capacity improvements are incorporated throughout our redundant North American manufacturing facilities. These investments enable us to meet and exceed your projected Viper Recloser needs, while also providing on time deliveries, and world class quality and performance.

Note that when given a forecast and firm commitment, we are able to add capacity fairly quickly to meet your specific need if it should increase in the future.

Thank you!

Best Regards,

Daniel Wycklendt
