RECIPIEN	T: Orl	ando Utilitie	es Commission		STATE:	۹L	
PROJECT TITLE :		Ele	Electric Vehicle Charging Hubs with Energy Storage and Floating Solar				
Funding		nding Oppo	rtunity Announcement Number	Procurement Instrument Number DE-EE0010755	NEPA Control Number	CID Number	
Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Policy 451.1), I have made the following determination:							
CX, EA, El Description	IS APPENDIX AN :	ND NUMBH	R:				
A9 Information gathering, analysis, and dissemination			Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analycial energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of appendix B to this subpart.)				
	A11 Technical advice and assistance to organizations		Technical advice and planning assistance to international, national, state, and local organizations.				
B3.6 Small-scale research and development, laboratory operations, and pilot projects		tory	Siting, construction, modification, operation, and decommissioning of facilities for smallscale research and development projects; conventional laboratory operations (such as preparation of chemical standards and sample analysis); and small-scal pilot projects (generally less than 2 years) frequently conducted to verify a concept before demonstration actions, provided that construction or modification would be within or contiguous to a previously disturbed or developed area (where active utilities and currently used roads are readily accessible). Not included in this category are demonstration actions, meaning actions that are undertaken at a scale to show whether a technology would be viable on a larger scale and suitable for commercial deployment.				
	15.1 Actions to cons r water	-	substances. These actions may involve financial and technical assistance Covered actions include, but are not limited to weatherization (such as in efficient lighting, low-flow plumbing futures (such as faucets, toilets, and efficient lighting); efficiency improvements for vehicles and transportation signal control systems; car ravigation, speed cametas, and automatic pu dealement; efficiency artifaction and the substance advancement and the substance and the substance dealement; entitiend or in including lancetors. Covered actions to not inclu- establish energy conservation standards for consumer products and indu- entitation and the substance lance and the substance munifacturing plants with considerable associated around disturbance);	r vater conservation, and promote energy efficiency that would not have the potenti- te to individuals (such as builders, owners, consultants, manufactures, and designe sualation and replacing windows and doors); programmed lowering of thermostat se is howerheads), heating, ventilation, and air conditioning systems, and appliances; in (such as field changeout); power storage (such as Tywheels and batteries, genera- ate number recognition); development of energy-inflicient manufacturing, industriat, dring renovations or new structures, provided that they occur in a previously disturbe ustrial equipment, provided that they actions would not: [1] have the potential to caus (2) involve significant unresolved conflicts conserving alternative uses of available o human health and the environment (such as RCRA hazardous wastes); or (4) have	rsi, organizatifons (such as utilities), and governments (titings, placement of timers on hold water heaters; install installation of drip-irrigation systems; improvements in g ally less than 10 megawatt equivalent); transportation m or building practices; and small-scale energy efficiency actions insted in 55 (b) of this spendix, (b) Covered as ea as significant change in manufacturing infrastructure resources (such as rare or limited raw materials); (3) ha	such as state, locai, and tribal), ation or replacement of energy anerator efficiency and appliance anagement systems (such as traffi and conservation research and mmerciai, residentiai, agricultural, tions include rulemakings that such as construction of new the potential to result in a	

B5.23 Electric vehicle charging The installation, modification, operation, and removal of electric vehicle charging stations, using commercially available technology, within a previously disturbed or developed area. Covered actions are limited to areas where access and parking are installations and accordance with applicable requirements in the proposed project area and would incorporate appropriate control technologies and bear.

Rationale for determination:

NEPA PROVISION

DOE has made a conditional NEPA determination.

The NEPA Determination applies to the following Topic Areas, Budget Periods, and/or tasks:

The NEPA Determination does not apply to the following Topic Area, Budget Periods, and/or tasks:

A completed EQ is required for the TBD location sites/charging stations. A separate NEPA review is required for the TBD location sites. And an additional NEPA review is required for the solar panels to be installed on the retention pond. This CX covers all activities except for the TBD location sites and solar panels on the retention pond.

Notes

A completed EQ is required for the TBD location sites/charging stations. A separate NEPA review is required for the TBD location sites. And an additional NEPA review is required for the solar panels to be installed on the retention pond. This CX covers all activities except for the TBD location sites and solar panels on the retention pond.

FOR CATEGORICAL EXCLUSION DETERMINATIONS

The proposed action (or the part of the proposal defined in the Rationale above) fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal must be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be confined in a manner designed and operated to prevent unauthorized releases into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be confined in a manner designed and operated to prevent unauthorized releases into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5)

There are no extraordinary circumstances related to the proposed action that may affect the significance of the environmental effects of the proposal.

The proposed action has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

A portion of the proposed action is categorically excluded from further NEPA review. The NEPA Provision identifies Topic Areas, Budget Periods, tasks, and/or subtasks that are subject to additional NEPA review.

SIGNATURE OF THIS MEMORANDUM CONSTITUTES A RECORD OF THIS DECISION.
