PMC-ND (1.08.09.13) OFF	ICE OF ENERGY EFF	RTMENT OF ENERGY ICIENCY AND RENEWABLE E DETERMINATION	NERGY				
RECIPIENT:	CALSTART,	Inc.		STATE: CA				
PROJECT TI	ITLE : S	ACHUB: Sustainable Access and Charging Hubs for	or Urban Benefits					
	Funding Opp	portunity Announcement Number DE-FOA-0002881	Procurement Instrument Number DE-EE0011242	NEPA Control Number	CID Number			
Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Policy 451.1), I have made the following determination:								
CX, EA, EIS A Description:	APPENDIX AND NUME	BER:						
A9 Ir anal	nformation gathering, lysis, and dissemination	Information gathering (including, but not limited to, literature s feasibility studies, and analytical energy supply and demand characterization or environmental monitoring. (See also B3.1	surveys, inventories, site visits, and audits), data analysis (including, but not limited to, comp studies), and information dissemination (including, but not limited to, document publication a of appendus to this subpart.)	buter modeling), document preparation (including, but not limited and distribution, and classroom training and informational progra	f to, conceptual design, ams), but not including site			
	A11 Technical advice and assistance to organizations Technical advice and planning assistance to international, national, state, and local		tional, state, and local organizations.					
deve	Small-scale research and elopment, laboratory rations, and pilot projects	pilot projects (generally less than 2 years) frequently conduct	, modification, operation, and decommissioning of facilities for smallscale research and development projects; conventional laboratory operations (such as preparation of chemical standards and sample analysis); and small-scale rally less than 2 years) frequently conducted to verify a concept before demonstration actions, provided that construction or modification would be within or contiguous to a previously disturbed or developed area (where active ly used roads are readily accessible). Not included in this category are demonstration actions, meaning actions that are undertaken at a scale to show whether a technology would be viable on a larger scale and suitable for ment.					
or w		substances. These actions may involve financial and technic Covered actions include, but are not limited to weatherzation efficient lighting, etwichow plumbing fixtures (such as faucets, fiftieincy raintings, efficiency inprovements for vahicles and th signal control systems, car navigation, speed cameras, and a development and smail-scale plut projects. Covered actions academic, institutional, or industrial sectors. Covered actions establish energy conservation standards for consonime produ manufacturing plants with considerable associated ground di significant increase in the disposal of materials point gaintificant	al energy or water conservation, and promote energy efficiency that would not have the poly al adsistance to individuals (usuch as builders, conservations, amanifacturers, and desi) (such as insulation and replacing windows and doors), programmed lowering of thermostation (such as insulation and replacing windows and doors), programmed lowering of thermostation anaportation (such as fleet changeout), over storage (such as flywheels and batteries, ger uturatie pater number recognition); development of energy-efficient manufacturing, industri include building renovations or new structures, provided that they occur in a previously dist do not include rulemakings, standar-dettings, or proposed DDE legislation, except for thos cts and industrial equipment, provided that the actions would not: (1) have the potential to c- sturbance); (2) involve significant unresolved conflicts concerning alternative uses of availat cant risks to human health and the environment (such as RCRA hazardous wastes); or (4) h	gners), organizations (such as utilities), and governments (such testings; placement of timers on hot water heaters; installation s; installation of drip-inrigation systems; improvements in geners really less than 10 megawat equivalent); transportation manag- iai, or building practices; and small-scale energy efficiency and theod or developed area. Covered actions could involve comme ea extons listed in B5.1(b) of this appendix. (b) Covered actions auce a significant change in manducturing infrastructure (such ave the potential to cause a significant increase in energy cons when the potential to cause a significant increase in energy cons	as state, local, and tribal), or replacement of energy ator efficiency and appliance gement systems (such as traffic conservation research and ricial, residential, agricultural, include rulemakings that as construction of new the optential to result in a sumption in a state or region.			
B5.2	3 Electric vehicle charging	The installation, modification, operation, and removal of elect	tric vehicle charging stations, using commercially available technology, within a previously di	isturbed or developed area. Covered actions are limited to area:	s where access and parking ar			

bit 20 Event venue unarging stations and vold incorporate apportance control ethnologies and best management practices.

Rationale for determination:

NEPA PROVISION

DOE has made a conditional NEPA determination.

The NEPA Determination applies to the following Topic Areas, Budget Periods, and/or tasks:

The NEPA Determination does not apply to the following Topic Area, Budget Periods, and/or tasks:

A completed EQ is required for the TBD location sites/charging stations. A separate NEPA review is required for the TBD location sites. This CX covers all activities except the TBD location sites.

Notes:

A completed EQ is required for the TBD location sites/charging stations. A separate NEPA review is required for the TBD location sites. This CX covers all activities except the TBD location sites.

FOR CATEGORICAL EXCLUSION DETERMINATIONS

The proposed action (or the part of the proposal defined in the Rationale above) fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements for DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actinists (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and nature] gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized releases into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized releases into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology and the s

There are no extraordinary circumstances related to the proposed action that may affect the significance of the environmental effects of the proposal.

The proposed action has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

A portion of the proposed action is categorically excluded from further NEPA review. The NEPA Provision identifies Topic Areas, Budget Periods, tasks, and/or subtasks that are subject to additional NEPA review.

SIGNATURE OF THIS MEMORANDUM CONSTITUTES A RECORD OF THIS DECISION.
