U.S. DEPARTMENT OF ENERGY OFFICE OF ENERGY EFFICIENCY AND RENEWABLE ENERGY NEPA DETERMINATION

RECIPIENT:

PROJECT TITLE:

BIL - Low-Cost and Scalable Second Use Battery Demonstration in Central California for Equitable Domestic Manufacturing and Job Growth

Notice of Funding Opportunity Number Procurement Instrument Number NEPA Control Number CID Number

Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Policy 451.1). I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:

Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental incontroling. (See also S.1 of appendix B to this subpart.)

development, laboratory operations, and pilot projects

Siting, construction, modification, operation, and decommissioning of facilities for smallscale research and development projects; conventional laboratory operations (such as preparation of chemical standards and sample analysis); and small-scale pilot projects (generally less than 2 years) frequently conducted to verify a concept before demonstration actions, provided that construction or modification would be within or contiguous to a previously disturbed or developed area (where active utilities and currently used roads are readily accessible). Not included in this category are demonstration actions, meaning actions that are undertaken at a scale to show whether a technology would be viable on a larger scale and suitable for commercial deployment.

B5.1 Actions to conserve energy or water, demonstrate potential energy or water conservation, and promote energy efficiency that would not have the potential to cause significant changes in the indoor or outdoor concentrations of potentially harm substances. These actions may involve financial and technical assistance to individuals (such as builders, owners, consultants, manufacturers, and designers), organizations (such as builders), and governments (such as state, local, and fribal). Covered actions include, but are not initimate to weatherization (such as insulation and actions; programmed lovering of themestal settings; pleacement of timers on hot water heaters; installation or replacement or energy efficient lighting, low-flow plumbing fixtures (such as faucets, toilets, and showerhads), heating, ventilation, and air conditioning systems, and appliances; installation of dip-irrigation systems; improvements for energy efficient programs; efficiency ratings; efficiency improvements for ventilects and transportation insurangement systems (such as starf signal control systems, car navigation, speed cameras, and automatic plate number recognition); development of energy-efficient manufacturing, industrial, or building practices; and small-scale energy efficiency and conservation research and development and small-scale plot projects. Covered actions include building pravactions of course in a previously disturbed or developed area. Covered actions could involve commercial, residential, academic, institutional, or industrial equipment systems or new structures, provided that they occur in a previously disturbed or developed area. Covered actions include rulemakings that establish energy conservation standards for consumer products and industrial equipment, provided that they actions would not (1) have the potential to cause a significant thange in manufacturing introduction glanks with considerable as accordanced sometical bording and starting the consumers (included as manufacturing introduction and are manufa

Significant increase in the bisposar of internative posing significant reads to internative and the environment (social as KCRX hazardoos wastes), or (4) mare the potential of the development increase in enterpy dotsumption in a sale of region of conditions and the properties of the potential of the development, quality assurance, or reliability for materials and equipment (including, but not limited to, wasters), but not limited to, wasters and experiments for concrete slabs designated and routinely used for that purpose), drop, puncture, water-immension, or thermal tests. Covered actions would not involve source, special nuclear, or byproduct materials, except encapsulated sources manufactured to applicable standards that contain source, special nuclear, or byproduct materials was be used for nondestructive actions such as detector/sensor development and testing and first responder field training.

Rationale for determination:

NEPA PROVISION

DOE has made a final NEPA determination.

Notes:

This CX determination replaces the previous determination and is being completed due to a site change for the project.

Skyline Hills Library - 7900 Paradise Valley Rd, San Diego, CA 92139-1460

The proposed action (or the part of the proposal defined in the Rationale above) fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb heazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in invasive species, unless the proposed activity would be contain paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposed action that may affect the significance of the environmental effects of the proposal.

The proposed action has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

The proposed action is categorically excluded from further NEPA review.

SIGNATURE OF THIS MEMORANDUM CONSTITUTES A RECORD OF THIS DECISION.
