

## 11. LIST OF PREPARERS

### U.S. Department of Energy

**Richard A. Hargis, Jr.**, NEPA Document Manager  
Office of Project Facilitation and Compliance, National Energy Technology Laboratory

**Mark L. McKoy**, Geologist and Environmental Manager  
Office of Project Facilitation and Compliance, National Energy Technology Laboratory

### U.S. Army Corps of Engineers (Cooperating Agency)

#### Environmental Consulting & Technology, Inc.<sup>1</sup>

**Jeffrey L. Meling, P.E.**, Senior Vice President  
Principal in Charge, overall ECT Project Manager  
M.S., 1979, Environmental Engineering, University of Illinois  
B.S., 1977, Civil Engineering, University of Illinois  
29 years of environmental impacts assessment experience, with emphasis on management of multi-disciplinary studies of power generation and transmission facilities

**Gary P. Uebelhoer**, Senior Vice President  
Assistant Project Manager  
M.B.A., 1976, Purdue University  
B.S., 1975, Environmental Engineering, Purdue University  
30 years of experience preparing multi-disciplinary environmental impact assessments of mining projects, including coal, copper/nickel, phosphate, potash, gold, and aggregates

**Martin J. Boote**, Staff Scientist  
Lead scientist, surface water resources and aquatic ecology  
B.S., 1992, Biology-Fisheries, Central Michigan University  
17 years of environmental consulting focusing on the biology and ecology of surface water resources, including biological surveys, environmental assessments, environmental impact statements, habitat assessment, limnological surveys, and geomorphological studies

**James E. Poppleton**, Principal Scientist  
Lead terrestrial ecologist  
M.A., 1976, Botany, University of South Florida  
B.S., 1972, Biology, University of Central Florida  
32 years of ecological consulting experience focusing on wetland delineation and permitting, listed plant species evaluations, vegetation description and mapping, and evaluation of the effects of air pollution on vegetation

---

<sup>1</sup> Appendix S contains the Letter of Understanding and Disclosure Statement pertaining to ECT's assistance to DOE in the preparation of this EIS.

**Maya R. Scohier**, Associate Scientist

Terrestrial ecologist, field team leader

B.A., 2002, Environmental Science, University of Florida

7 years of environmental experience, with emphasis on in wetland delineation and permitting, land use/cover mapping, and mitigation monitoring

**John E. Shrock**, Senior Scientist

Lead air quality scientist

M.S., 1976, Environmental Science, Indiana University

B.A., 1974, Physics and Psychology, Indiana University

Over 30 years of experience in the field of air quality, with emphasis on permitting and modeling of industrial sources

**Philip W. Simpson**, Vice President, Principal Scientist

Lead wildlife biologist

M.S., 1976, Wildlife Management, University of Michigan

B.S., 1973, Wildlife Science, Purdue University

32 years of environmental impact assessment experience, with focus on ecological impacts of energy development, particularly power plants and electric transmission lines

**Richard J. Stebnisky, P.G.**, Principal Scientist

Lead geologist/hydrogeologist

M.S., 1997, Hydrogeology, University of South Florida (Tampa)

B.S., 1983, Geology, Edinboro University of Pennsylvania

24 years of environmental impacts assessment experience, with emphasis on hydrogeologic evaluations and groundwater quality and quantity studies related to power generation and other industrial facilities

**Darren L. Stowe, AICP**, Principal Scientist

Lead land use planner

1990, Graduate Study, Urban and Regional Planning, Florida State University

B.S., 1975, Biology, Cornell University

24 years of land use and socioeconomic impacts assessment experience, with emphasis on mining, electrical power plants, electric transmission systems, and other large-scale developments

**Domenick M. Tufariello, P.E.**, Senior Engineer

Surface water resources engineer

1997 – 2001, Graduate Studies, Water Resources, University of South Florida

B.S., 1996, Civil Engineering, University of South Florida

13 years of regional stormwater management planning, watershed hydrology, design of stormwater facilities, wetland rehydration, site development, hydrologic and hydraulic modeling, and permitting

**Jill Van Dyke, CPG, CUSTP, CHMM**

Hydrogeologist, groundwater modeler

M.S., 1994, Hydrogeology-Geology, Western Michigan University

M.S., 1979, Geophysics, University of Minnesota

B.A., 1976, Geophysics, Hope College

30 years of experience in complex hydrogeological, geological and geophysical technical investigations, groundwater availability and contaminant fate and transport computer modeling
