Collaboration Opportunities

Many current and potential partners in the water-energy arena.

- Federal agencies have important activities at the water-energy nexus, as do regional, state, tribal, and local authorities
- Non-Federal Government
 - private companies
 - national non-governmental organizations (NGOs)
 - international governments
 - universities
 - and municipal facilities
- Working with NETL to develop strategic R&D initiatives that improve the efficiency of water use by the power industry

Water-Energy Nexus Initiative

Strategic Pillars / Challenges

1. Optimize the freshwater efficiency of energy production, electricity generation, and end use systems
2. Optimize the energy efficiency of water management, treatment, distribution, and end use systems
3. Enhance the reliability and resilience of energy and water systems
4. Increase safe and productive use of nontraditional water sources
5. Promote responsible energy operations with respect to water quality, ecosystem, and seismic impacts
6. Exploit productive synergies among water and energy systems
