2021 Carbon Management and Oil and Gas Research Project Review Meeting

August 2021

Location: Series of Virtual Meetings Using WebEx

You are cordially invited to attend the U.S. Department of Energy's (DOE) National Energy Technology Laboratory (NETL) *2021 Carbon Management and Oil and Gas Research Project Review Meeting* to be held in August of 2021 through a series of WebEx Virtual Meetings.

This project review meeting will allow researchers to present results from projects funded through a wide variety of DOE's program areas. Combining into one meeting all of these research areas means the audience can get an overview of the breadth and depth of the carbon management and the oil and natural gas programs. The meeting will provide updates and results for more than 250 DOE-sponsored projects.

The virtual meetings will be conducted over a one month period and will include presentations in the areas of: Carbon Capture, Carbon Storage, Oil and Natural Gas, Carbon Utilization, Direct Air Capture, Integrated Projects, FEED Studies, Pilot Scale Projects, Oil & Natural Gas Field Lab Projects, Unconventional Projects, Hydrates and Offshore Projects. Please check back in the following weeks for a more complete schedule under the NETL Events page.

NETL understands that these are unusual times, but NETL is committed to providing you with an update on the projects that are currently underway and to highlight the valuable work being done across the country.

For information or questions regarding the program content, please contact:
