

**Scott Hume**  
Principal Technical Leader, Electric Power Research Institute  
(EPRI)

## **Benefits and Challenges of Mid-duration Bulk Energy Storage**

### **Biography**

Scott has over 20 years of experience in the design aspects of advanced technology in the power industry. More recently, he has focused on modelling supercritical carbon dioxide power cycles, testing carbon capture processes, and evaluating bulk energy storage technologies with particular focus on thermal energy storage technologies that offer integration opportunities with advanced thermal plant.
