OVERVIEW

The U.S. Department of Energy National Science Bowl® is a nationwide competition “like no other” held annually to promote education in science, technology, engineering and math (STEM). Middle and high school students compete as teams in an action-packed quiz bowl format to answer questions on a range of disciplines including biology, Earth science, physics, energy, math, and engineering.

The West Virginia Regional Science Bowl® (WVSB) is one of many regional competitions for middle and high school teams across the country to select participants for the National Science Bowl held in Washington, D.C. Co-hosted by the National Energy Technology Laboratory and West Virginia University, the WVSB is held annually in February at the WVU Mountainlair.

WEST VIRGINIA SCIENCE BOWL

VOLUNTEERS NEEDED

Simply put: The WVSB could not happen without the generous time and energy of our volunteers. By participating as a volunteer, you are supporting STEM education across the state of West Virginia and encouraging our state’s youth to excel in these important areas. These efforts not only benefit our students, they also contribute to our state’s – and our nation’s – competitiveness, innovation and future technological workforce. Volunteers, who will receive training to ensure confidence in their respective roles, can serve in a variety of roles:

- Moderator – Reads questions to teams. Requires a background in science, engineering and/or math and a thorough knowledge of the competition rules.
- Science Judge – Assists the moderator. Requires a background in science, engineering and/or math and knowledge of the competition rules.
- Rules Judge – Enforces the rules of the game. Requires a thorough knowledge of the competition rules of the game.
- Timekeeper – Keeps match time. Requires no prior experience.
- Scorekeeper – Keeps match scores. Requires no prior experience.
- Score Runner – Picks up scores from matches and takes to scoring area. Requires no prior experience.
- Other help – Sets up, tears down, assists with engineering activities, and lends a hand where needed.

VOLUNTEERING PERKS

In addition to the enthusiastic gratitude of WVSB participants and organizers, the WVSB offers volunteers an opportunity to network with area STEM professionals and, at the same time, demonstrate leadership as a professional role model. WVSB volunteers are an integral part of a nation- and state-wide effort to encourage students to pursue STEM fields so critical to our future workforce. Enhance your resume, serve your community, and develop people skills – all while having fun!

Students listen as the room’s moderator goes over the rules before the competition begins.

Volunteers prepare to judge one of the many competitions throughout the day.
